# MIC B Vitamin

Kick-start your patient’s metabolism while you boost your revenue!

Lipotropic B12 injections can provide a pharmaceutical approach to a medical weight loss treatment program. Our proprietary blend of B vitamin with L-Methionine, Inositol, and Choline helps control how the body metabolizes fat on a cellular level, supporting the progress of weight loss by increasing the body’s ability to process food, all while increasing energy.

This vitamin is so successful, a Men’s Health clinic in Tucson, AZ made \$9,800 in sales the first 3 weeks it was introduced to their patients!

## Benefits of MIC Super B injections

- Aids weight loss (in conjunction with medically supervised program)
- Breaks down artery fats and helps prevent cholesterol build up
- Metabolizes fats and carbohydrates more efficiently
- Helps transport fats in the blood system for elimination
- Assists in eliminating abnormal fatty liver deposits
- Increases daily energy levels
